

BACK TO SCHOOL MORNINGS

What time does your child need to be at school?

What time do you need to leave home in order to get to school on time?

(Subtract 10 minutes from this time. Create an alarm on your phone for your kids to get ready to leave at this time.)

What all needs to get done?

Who needs to do it?

How long does it take?

Total time it takes to get ready (add these altogether):

What time do you need to start your routine in the morning?

(Subtract the total time to get ready from the time you have to leave the house above. Create an alarm on your phone that tells your kids its time to start their morning routine. Or for you to wake them up.)
